Ivan Verkhoturov, Front end Developer

TBILISI, GEORGIA · verkhoturov314@gmail.com · +995 555 208 695

PROFILE

Frontend developer with 5+ years of experience, specializing in React, Next.js, and TypeScript. Focuses on optimizing processes through modern tools, automation, and UI Kit development. Manages tasks from decomposition to production deployment independently and mentors junior developers.

EMPLOYMENT HISTORY

Web developer, Romania Business Labs SRL

Jul 2023 — Present

In a globally distributed team, I develop interfaces for a Romanian startup that creates cloud-based solutions for accounting and finance. Website, linkedin

Main products: E:corg, OneConta

- **Improved development efficiency** and reduced the time to deploy new versions to production from several months to a few weeks by implementing a modern tech stack and UI Kit using Next.js, TypeScript, and NextUI.
- **Optimized the deployment process** by setting up CI/CD with GitHub Actions, automating project delivery to production, and minimizing downtime during updates (zero downtime).
- **Simplified content management** by integrating the Strapi CMS, enabling managers to independently manage content, reducing dependency on developers.
- **Mentored junior developers** and conducted code reviews, helping to maintain high code quality and enhance team skills.

Frontend developer, Sibur Digital

Jun 2021 — Jul 2023

- **Developed business logic for interfaces**, improving the accuracy and efficiency of production processes as part of a factory digitization project.
- **Enhanced requirement understanding and implementation** by closely collaborating with analysts, managers, and system users, translating their requests into technical specifications.
- **Increased system stability and user experience** by analyzing bug reports and promptly resolving critical issues.
- **Accelerated development and improved interface consistency** by contributing to the growth of the internal UI component library.

Frontend developer, Equilibrium

Mar 2018 — Jul 2021

- **Accelerated the development of web interfaces for fintech services** by implementing a React-based UI Kit, reducing product release cycles from 1-2 sprints to one week and ensuring interface consistency without expanding the team.
- **Improved code stability and quality** by rewriting the project in TypeScript, which decreased application crashes and reduced minor bugs.
- **Maintained and developed web interfaces**, including coding landing pages and email templates, ensuring high quality and design fidelity.

HTML coder, OTP Bank

May 2017 — Mar 2018

- **Created and maintained new website pages**, landing pages, and email templates, as well as developed interactive elements such as loan calculators and contact forms, enhancing the site's functionality and user experience.
- **Improved the development process** and saved the company around one million rubles over 8 months by taking over all frontend development previously handled by a contractor, including complex promo pages and JavaScript logic.
- **Ensured content accuracy on the site** by working with backend contractors, setting tasks, and controlling deadlines.
